

Environmental Statement

The Green Earth Logistics is committed to its Health, Safety and Environmental legal obligations and responsibilities.

Our greenhouse gas emissions are by far our organisation's most significant environmental impact. 98% of our emissions footprint is the result of truck diesel burn.

We want our customers and stakeholders to be impressed by our environmental performance so that they choose Green Earth Logistics ahead of all other transport options.

To achieve this we must demonstrate effective management of our environmental risks. There are ongoing opportunities for Green Earth Logistics to enhance its environmental performance and improve its corporate reputation.

Green Earth Logistics has an Environmental Policy that commits the organisation to:

- Applying sound environmental management practices based on the principles of Ecologically Sustainable Development;
- Protecting the environment and the prevention of pollution through all phases of our operations;
- Providing strategic direction to employees in managing environmental impacts with a focus on continual improvement;
- Creating an environmentally aware culture where responsibility is assigned and understood;
- Reporting to and communicating with government, industry and community stakeholders;
- Providing an appropriate Environmental Management System that reflects our major risks; and
- Providing an audit and review framework to ensure that the system is operational, effective and is meeting these requirements;

Our actions and choices reflect directly on our performance. Green Earth Logistics commitment to the environment will ensure that environmental issues are considered as part of everyday decision-making processes.

Whatever our job, each of us has a responsibility to identify environmental risks, implement suitable control and report all incidents that have caused environmental harm or had the potential to do so.

Protecting the environment is fundamentally important to Green Earth Logistics and we have a duty to each other and to the community to manage our activities in an environmentally responsible manner.

The cooperation and dedication of all Green Earth Logistics employees and our contractors is vital to delivering on our environmental commitments.
